

Jessica Nguyen

Web Developer

I have over 4+ years in building, maintaining, and updating websites. For the past year, I have been expanding to do more creative work with Adobe Creative Cloud developing logos, artwork, and etc.

WORK EXPERIENCE

Web Developer Medzon Health

04/2022 - 06/2024

As the main technical developer for tech related inquiries. I am currently working on rebuilding multiple websites using HTML, CSS, WordPress, and JavaScript. In addition to developing/assisting in tech related inquiries, I design packaging, technical data sheets, sales flyers, and social media posts to maintain our online presence.

Assistant Director/ Lead Sensei Code Ninjas

08/2019 - 06/2022

As the lead sensei/ Assistant Director, I have worked on guiding children to understand the basics of programming. For our curriculum, we start the younger students on the Scratch platform eventually leading them to advance Javascript and C#. I help manage the workspace and ensures all students are on track with understanding the curriculum as well as create and implement a new curriculum designed to assist students in coding and ensuring all team members are up to date with the current protocol.

Vlocity Developer Mettadepth

11/2021 - 04/2022

In this project, I worked with a multinational team as a Vlocity Developer to help implement Agency (NASA enterprise-wide) forms management and development application. I utilized Salesforce's platform and Salesforce's Industries (previously known as Vlocity) in creating the Agency forms management and development application. I also supported in assigned development tasks including but not limited to Lightning Web Component(LWC), CSS, Community Updates, General Salesforce Configuration.

Web Developer NEP Services

08/2019 - 11/2021

As a front end developer in a multiple projects for NEP Services, I worked on creating various websites for nonprofits and police/fire unions. Using Joomla, I was able to create various websites using HTML, CSS, and JavaScript. Every week, our team of developers would hold agile/scrum meeting to figure out the plans for the week and to make sure we were on track with our builds. In addition to creating websites, I would work on requests sent in by our clients when they wanted to make adjustments on their site.
